

## *Program-A-Bead 3*

### Servo Driven, Positive Displacement Meter for 1-Part Materials

Program-A-Bead 3 Meter System

- ▶ Designed to automate the dispensing of single component sealers by integrating the system with a robotic work cell via Device-Net communications protocol
- ▶ Servo drive permits variable speed dispensing to coordinate the rate of dispense with the robot tool tip speed via the analog signal
- ▶ Positive displacement rod style metering sized for the application
- ▶ Stainless steel construction wetted parts throughout the meter
- ▶ Power inlet and outlet valves

Dispensing Extruded Bead with  
2200-033 Snuf-Bak® Valve
